INTERPLANT ROSES 2

Global Leader in Spray Roses

Interplant Roses B.V., founded 50 years ago and still run by the Dutch IJssink family, is the global leader in spray rose breeding. Being the very first rose breeder to develop spray roses for the cut flower industry, Interplant has seen this market evolve tremendously over the past 20 years.

Potential

Today, spray roses have found their way to all market segments: from wholesalers to florists and consumers; they all have discovered the great potential of this versatile flower.

Top-quality

In the last decade the spray rose quality has improved enormously and they are now superior in every respect. As a result their popularity is growing fast and around the globe spray roses are increasingly being used in mono bouquets, supermarket bouquets, mixed bouquets as well as in exclusive flower arrangements.

Trendy colours

With the release of new types of spray roses with distinctive shapes, trendy colours, fragrance and large-flowered varieties, the time has come to issue a new edition of *Spray Roses - The Ultimate Handbook 2*. Robert IJssink CEO Interplant Roses: "We proudly present our new, handy sized A5 ring binder guide, offering an overview of 93 currently available varieties of spray roses classified by colour. Practical information about stem lengths, vase life and VBN code is also provided for each cultivar".

Brand new

In the second section of this guide, you will find our Clustar® varieties, a new kind of rose, developed by Grandiflora Nurseries Pty. Ltd. Australia, combining cut rose and garden rose genetics in a hybrid rose. It looks much like a garden rose but has a long, vibrant vase life. Clustar® Roses feature an elegant yet distinctive cup shape and have multiple blooms per stem, enabling florists and floral artists around the world to create masterpiece arrangements.

More information

For more information about Spray Roses please visit www.interplant.nl.

Disclaimer

This Ultimate Handbook contains general information on our products and does not provide binding specifications regarding the varieties described in it. The information and product representations, including images, in this handbook are based on optimise cultivation circumstances in The Netherlands. As will be evident actual breeding results achieved with our varieties may be influenced by cultivation, handling and treatment and environmental factors (such as temperature, moisture, wind, fertility and diseases) and may therefore vary from grower to grower. Therefore, neither Interplant Roses, nor anyone involved in the production of the handbook, can be held responsible for any loss or damage caused as a result of the use of information in this handbook. Interplant Roses is in no way liable for any claims arising from the use of the information provided in this handbook.
